

Data and Applications

Project Phase II

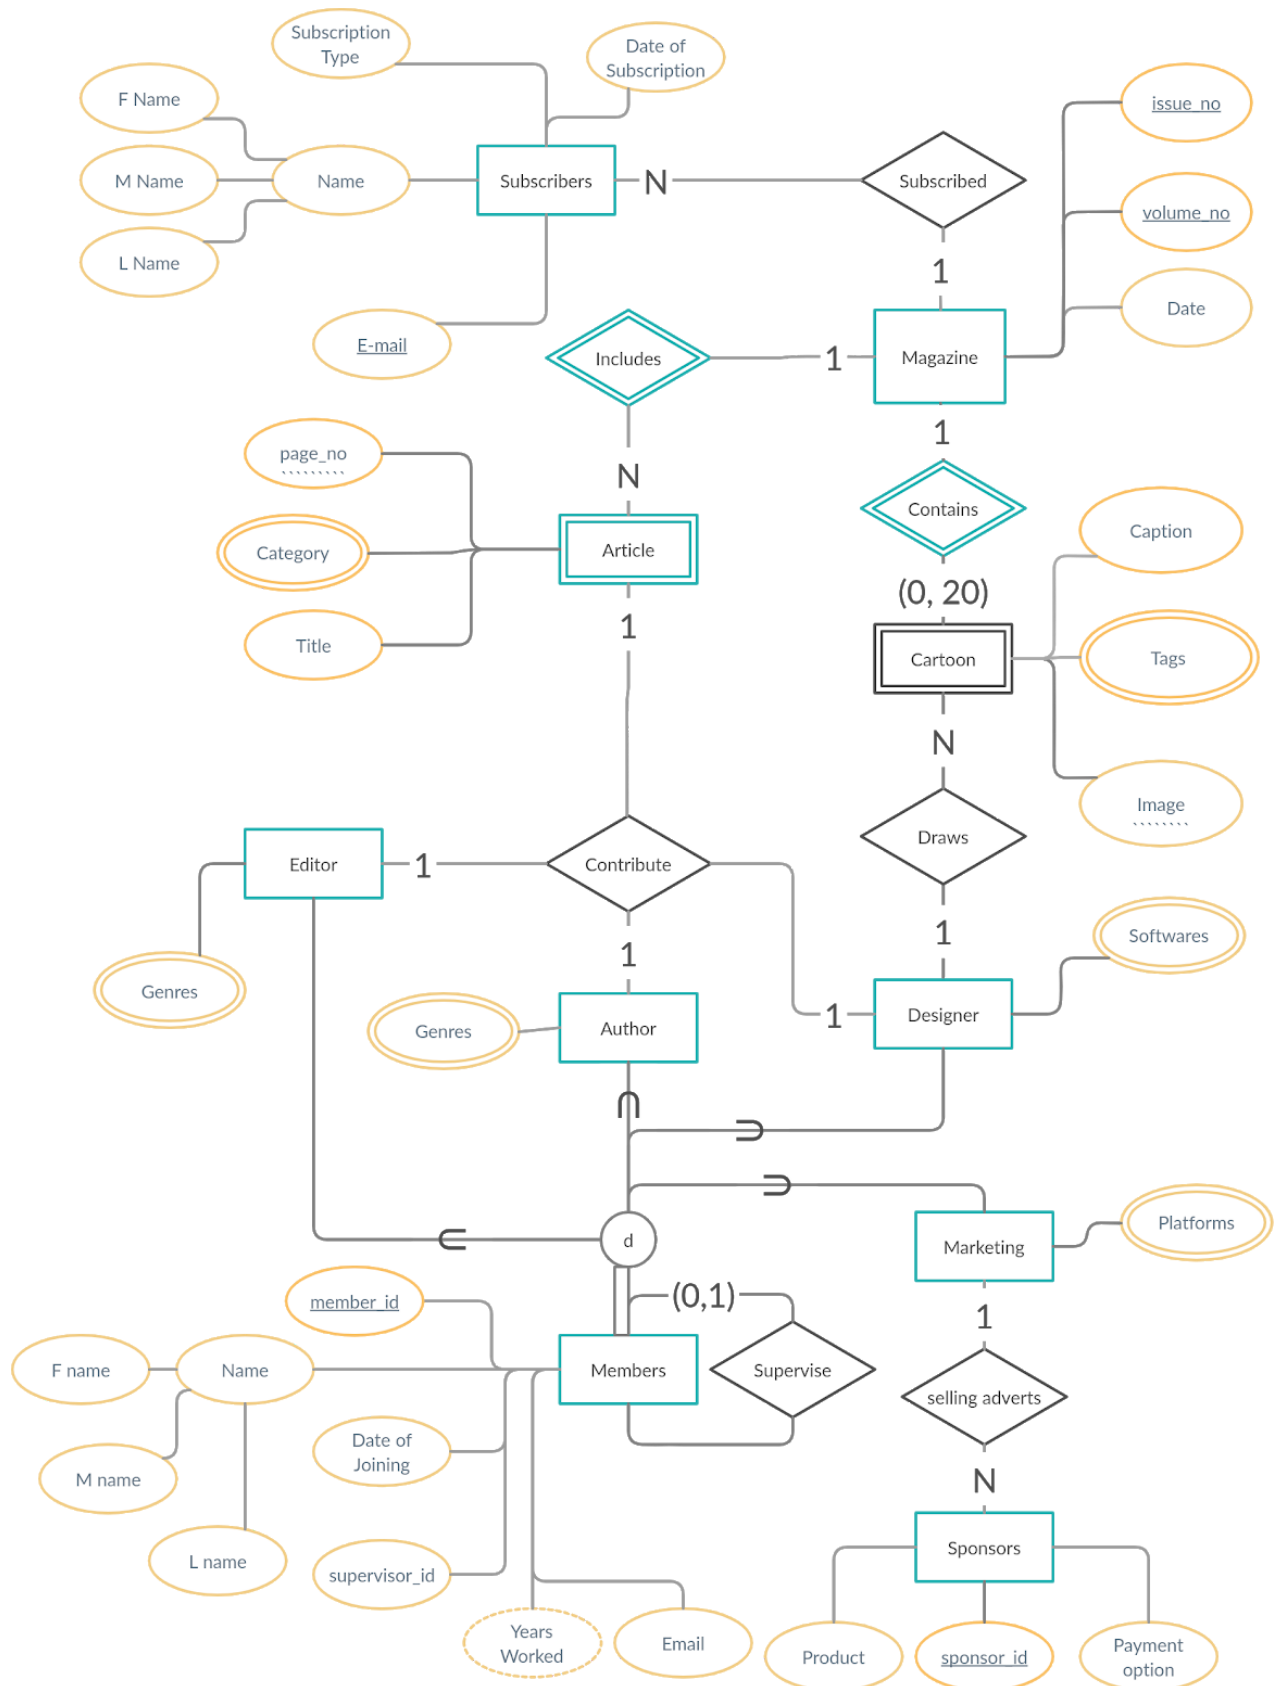

Team 16: Data Kedavra:

Pahulpreet Singh [2019113013]

Rishabh Khanna [2019113025]

Kshitijaa Jaglan [2019115005]

Entity Relation Diagram:

Modifications (from Phase I):

1. Changed attribute “Name” of entity “Subscriber” to a composite attribute.
(F Name, M Name, L Name)
2. Added identifying relation “contains” to weak entity “Cartoon” with strong entity “Magazine”.
(Had mentioned in the last document that “Cartoon” was a weak entity identified by entity “Magazine”, but hadn’t mentioned the name of the relation)

A cartoon is identified by a single magazine, and a magazine can have anywhere between 0 to 20 cartoons.
